

Report of JCA Parent Club

Fortune High Tech Marketing Model

高科技财富模型探讨

Speaker: Mr. Mel Case

Reporter: James Gao, March 14, 2010

The presentation was an introduction for a business opportunity that had potential to provide an additional stream of income for you and your family. This business model is different from traditional marketing network.

Mr. Case told the parents how he and his wife started this business and presented details about how this business model worked.

Mr. Case emphasized that FHTM (Fortune High Tech Marketing) did not make any products and did not require to sell any products. The business is to take the commission back to you-self on the reoccurring services that you are paying to somebody else now.

He concluded that the business hours were very flexible. It fits your own working schedule. The main effort that you need to make is to invite your friends who are interested in additional income to the rest of their life to join the business.
